

AgileWay

AgileWay is a web-based application for flight selection and booking. This repository contains the manual testing documentation and defect tracking for the project.

Manual Testing

Manual testing has been performed to ensure the functionality of flight selection, booking, and related features.

- **Test Cases:** Documented in a Google Sheet: [Link to Test Case Sheet](#)
- **Defect Reports:** Tracked in a Trello board: [Link to Trello Board](#)

Project URL

Access the live project here: [AgileWay Web App](#)

Notes

- Each board contains lists of test scenarios and defects for better tracking.
- Test cases in the Google Sheet include steps, expected results, and status.
- Defects in Trello include priority to help organize fixes efficiently.
